

Prajwal Hiremath

Passport: C1030592 | **Date of birth:** 24/11/2000 | **Place of birth:** Hubballi, India |

Nationality: Indian | **Gender:** Male | **Phone number:** (+49) 15210392264 (Mobile) |

Email address: prajwal.v.hiremath0@gmail.com |

Address: Stromstraße 36, DE-01-145, Room 5th Floor, 10551, Berlin, Germany
(Home)

● ABOUT ME

Passionate about the space industry, I am adaptable, reliable, and effective at managing responsibilities under pressure. I have demonstrated the ability to work both collaboratively within teams and independently, with strong time-management skills and a commitment to continuous learning and professional growth. Additionally, I bring strong communication skills and have successfully collaborated with diverse, multicultural teams.

● WORK EXPERIENCE

ASSISTANT ENGINEER – AXISCADES TECHNOLOGIES LIMITED – 01/08/2022 – 07/02/2025 – BENGALURU, INDIA

Address: 2nd Floor, Kirloskar Business Park, Block 'C', Hebbal Kempapura, Bengaluru, 560024, Bengaluru, India

Project: AIRBUS A330 LR P2F Conversion

- Fatigue justifications for the P2F conversion project. Prepared technical justifications for more than 150+ aircraft structural repair cases with multiple levels of complexity.
- Analyzing the structural components affected and identifying the critical parts susceptible to fatigue loads and the load paths affected due to the performed repair and providing engineering justification accordingly. Good grip on the technical concepts of F&DT and skilled in ISAMI Tool.
- Ability to propose solutions, make independent deliveries and perform multiple quality checks with formats maintained as per customer requirements. Additionally, developed a tool with MACRO for post-processing the ISAMI output files.

INTERN – AXISCADES TECHNOLOGIES LIMITED – 03/2022 – 07/2022 – BENGALURU, INDIA

- Training related to different structures present in an aircraft, specifically the fuselage section and basics related to type of joints, fasteners, material, type of non-conformities, and the repair solutions required to handle any defects as per the standards as specified by the customer keeping in mind the structural integrity. Instructor-led sessions, e-learning modules, and learning on the job.

INTERN - DESIGN ENGINEER – SPACE TECHNOLOGY AND AERONAUTICAL ROCKETRY – 09/2020 – 10/2020 – REMOTE, INDIA

Problem Statement:

To design a rocket motor static test pad for testing and acquiring the required data for the performance analysis of the high-powered rocket motors. The following objectives were met successfully during the internship period.

- A Static Test Pad (STP) mechanism was designed keeping in mind a good strength/weight ratio, modular design and ergonomics. Also, install all electronics and power systems conveniently.
- The designed STP was incorporated with an electrical power system, a data management system to store and analyze the data with real-time data transmission and reception.

INTERN – SKYLINE SPACE – 28/09/2024 – 28/10/2024 – REMOTE, INDIA

- The internship and training program on space rovers and robotics which provided a comprehensive overview of rover fundamentals, including basic concepts, various types, and essential subsystems, along with an examination of rover kinematics to understand movement and functionality.
- Introduction to astrodynamics, exploring key principles such as Keplerian variables and foundational concepts in orbital mechanics.
- Complete 3D modeling of a rover using SolidWorks, which included the rocker-bogie suspension system, wheel assembly, chassis design, and manipulator arm configuration. The program included preliminary engineering analysis using ANSYS Workbench to conduct static, modal, random vibration, and thermal analysis of modeled rover components.
- Using MATLAB to analyze the kinematics of the rover and using SIMULINK to visualize the same.

● EDUCATION AND TRAINING

08/2018 – 08/2022 Bengaluru, India

B.E AEROSPACE ENGINEERING R V College of Engineering

Major Project in B.E Aerospace Engineering:

The project titled "In-house Tool Development To Carry Out Modal Analysis And To Determine The Damping Of The System" in which a structure was modeled in ANSYS Mechanical APDL and modal analysis was performed to generate the modal parameters. The structure modeled in ANSYS Mechanical APDL was fabricated and tested by the Ground Vibration Testing method and the acceleration and force data were obtained. MATLAB was used to generate the Frequency Response Functions (FRFs), with these the modal parameters were obtained. The simulation results were compared and validated with real-world outcomes, and an in-house tool was built that incorporated the GUI to facilitate the input of data to obtain the required results in real-time.
